The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 55-78 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bergemann in view of Abe, Sugiura, and Watabe.

The previous rejection still applies.

Applicant's arguments filed 6/10/04 have been fully considered but they are not persuasive. Applicant's argues that there is no motivation in the applied references because Sugiura and Watabe are not in the light bulb art. This argument is not convincing of patentability because Begemann is actually a hybrid of the light bulb art and semiconductor art and one of ordinary skill clearly would be led to both arts in viewing Begemann. Clearly, considering the solid state light emitters of Begemann one would look to the semiconductor solid state art for various suggested solid state emitters such as Sugiura and Watabe for producing bright blue light. The applied art is analogous considering the hybrid nature of the Begemann device.
